

LA Subject 2008 Masters assignment

Research project on "**The modern cadastre**".

The project should cover:

1. The roles and tasks performed by modern cadastres in nations with successful systems,
2. How nations that do not have cadastres perform these roles and tasks,
3. Your evaluation of which approaches are more sustainable.

Length 4000 words

Masters students are exempt from the Mini Assignment.

The above is designed as an essay by each student. There will be masters classes in which the assignment will be discussed in detail. They will be expected to prepare for these masters classes and Ms Jude Wallace will give them some prior reading.
